

### DEPLOYMENT

- **ENGINEERING** - BPS can assist in defining your equipment specifications and developing the Bill of Materials. Our focus is critical power and we can help select the right design for your specific needs.
- **PROCUREMENT** - Our familiarity with all major power manufacturers gives us the experience to coordinate products and materials to meet your timeline.
- **STAGING** - Our south Seattle facility includes over 15,000 sq ft of warehouse with designated areas for receiving, inspection, charging, testing, and storage. Additionally, it includes over 1,000 amps of charging capacity to power extensive battery systems. During the staging phase, we will perform the following:
  - Shipment Inspection - Upon arrival, a thorough inspection is conducted, so any freight damage or parts shortages are resolved prior to installation.
  - Equipment Assessment - As required, we will configure components and conduct a performance test to ensure system integrity.
  - Battery Capacity Testing - As requested, BPS will conduct battery initial charging followed by a capacity test per IEEE standards. Performing this critical test before installation, will ensure your battery is at rated capacity and will significantly assist in meeting your turn-up schedule.
  - Re-Package - BPS will re-package equipment and ready for transport.
- **TRANSPORTATION** - BPS delivers utilizing our own drivers and truck fleet.
  - BPS Drivers maintain Class B, CDL with Haz Mat Endorsement
  - Pollution Transportation Coverage
  - MCS-90 Hazardous Material Endorsement
  - Registered with DOT for Hazardous Material
  - Vehicles include boom trucks, 4-wheel drive, & high capacity lift gate trucks
- **DELIVERY** - BPS maintains specialized material handling equipment to accommodate even the most difficult basement or high rise delivery location.

### RELOCATION & STORAGE SERVICES

- **EQUIPMENT SHUT DOWN** - Equipment shut down and disassembly.
- **PACKAGING** - Specific procedures for preparing batteries for transport.
- **TRANSPORT** - Licensed and insured for battery transport.
- **STORAGE** - Storage services include periodic charging for batteries.
- **RE-INSTALLATION** - Transportation to new location and installation.
